Sprint 1 Plan
Project Name: VTC
Team Name: VTC Team
Sprint Completion: 2/4/2018

Goal:
      This sprint is allocated to starting the project, creating the account system, and allowing accounts to connect with each other.

Task Listing:
1. Lay down framework for app (3)
    a. As a developer, I need a place to start and build the app from.
        i. Task 1 (2): Preliminary app layout(hub)
        ii. Task 2 (1): Start screen
2. Create accounts (5)
    a. As a product owner, I want users to be able to create accounts efficiently on VTC so that users aren't pushed away from a tedious sign up and therefore there are more downloads.
    b. Alternate suggestion: As a user, I want to be able to easily sign up and access my account. (more concise, more user-focused)
        i. Task 1 (1): Implement Google sign in
        ii. Task 2 (1): Design menu in app to create account or sign in
        iii. Task 3 (3): Implement profiles, etc.

3. Allow users to add friends (3)
    a. As a developer, I want users to be able to add friends so that users can share memories with their friends.
        i. Task 1 (2) : Implement graph for friend connection (edge = friends, maybe needs to work together with profile implementation)
4. Allow users to upload photos and video(If task 3 doesn't work out, this is an idea) (this also may be more Sprint 2 stuff)
    a. As a user, I want to be able to upload photo and video memories to be viewed later.
        i. Task 1 (2): Integrate android camera api to access camera from app
        ii. Task 2 (1): Access phone storage from the app
    b. As a developer, I want to ensure that our database efficiently and accurately stores users' memories
        i. Task 1 (2): Set up Firebase
   ii. Task 2 (2): Connect firebase

Team Roles:
1. Lizette: Product Owner
2. Michael: Scrum master

3. Ruchi: Developer
4. Gamiel: Developer
5. Matthew: Developer
6. Austin: Developer

Initial Task Assignment:
1. Lizette: Preliminary Layout Design + Start screen (3)
2. Michael: Setting up Firebase (2), Connecting Firebase (2)
3. Ruchi: Implement google sign-in + menu design signup/login (2)
4. Gamiel: Implement profiles (3)
5. Matthew: Implement graph for friend connection (2)
6. Austin: Integrate Camera API (2), access phone storage (1)

Initial Burn Up Chart:

Scrum Board:
https://trello.com/b/9w5exgOh/sprint-1

Scrum Times:

Sundays 2-3,
Tuesdays 2-3,
Thursdays 2-3 (TA 2:30)
